DETAILED ACTION

Response to Amendment

1. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was found to be persuasive.

Allowable Subject Matter

2. Claims 1 – 4 and 6 – 20 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1 – 4 and 6 recite, inter alia, a method for selectively altering the dielectric constant of dielectric material within a semiconductor device, the method comprising applying energy to the interconnect structure surrounding a local region of interest including a thermally alterable dielectric such that the heating caused by the applied energy is transferred to the dielectric causing its dielectric constant to change. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 7 – 20 recite, inter alia, a method and apparatus for selectively altering the dielectric constant of dielectric material within a semiconductor device, the method comprising selecting a thermally alterable dielectric material within a local region of interest, forming an interconnect structure around said local region of interest, the interconnect structure configured to provide external input/output access with respect to the semiconductor device for applying energy to the interconnect structure such that the applied energy causes the dielectric constant of said thermally alterable dielectric to

change. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.
